PROFESSIONAL SUMMARY

Senior WordPress Developer with nearly 6 years delivering 620+ sites across WordPress, Webflow, Shopify and other platforms, specializing in PHP custom themes and custom plugins, WooCommerce, payment and CRM API integrations, security hardening and Core Web Vitals, with team leadership and mentoring experience. At Certinal (a Zycus company; healthcare-focused consent and eSignature SaaS for India's DPDP Act), headed the marketing site's move from WordPress to Astro and now manages its 1,640 pages through Claude Code and Model Context Protocol (MCP) servers. Also builds agentic AI tooling, from a Claude outreach plugin to a locally fine-tuned open-weight LLM for WordPress development.

TECHNICAL SKILLS

WordPress: Custom Themes · Custom Plugins · Hooks & Filters · Custom Post Types & Taxonomies · Custom Shortcodes · Template Overrides · Gutenberg · Elementor Pro (custom widgets) · Advanced Custom Fields (ACF Pro) · WooCommerce · Crocoblock JetEngine · JetSmartFilters · WPML · WP-CLI

Page Builders & Themes: WPBakery · Beaver Builder · Divi · Avada · Astra · LiveCanvas

Languages & Frontend: PHP · JavaScript (ES6+) · MySQL/MariaDB · AJAX (with nonce verification) · HTML5 · CSS3 · Responsive Design · Bootstrap 5 · jQuery · Astro · Node.js (nvm) · GSAP · SVG Animation · Swiper.js · PhotoSwipe · particles.js · Python, React, TypeScript, Vite & Tailwind CSS (personal projects)

AI Engineering & Agentic Workflows: Claude Code · Claude Plugins & Agent Skills · Subagents & Slash Commands · MCP Server Development · MCP Bundles (.mcpb desktop extensions) · CLAUDE.md Project Memory · Prompt & Context Engineering · LLM Guardrails & Prompt-Injection Defense · Novamira (WordPress MCP) · Cursor · Gemini · Google AI Studio · Grok · Lovable

Local LLMs & Fine-Tuning: MLX (mlx-lm) · LoRA/QLoRA Adapters · Qwen3.5-9B (4-bit MLX) · On-Device Inference (Apple Silicon) · LM Studio · OpenCode · Repomix

Automation & Scripting: Bash/Shell Scripting · SSH Automation (PuTTY) · SMTP/IMAP Email Automation · Web Scraping (robots.txt-compliant) · Cron Jobs · Chrome Extensions (Manifest V3)

DevOps, Hosting & Security: Sevalla · Cloudflare (Pages, DNS, WAF) · Cloudways · CI/CD (trunk-based development, dev-to-prod promotion) · Git · GitHub Actions (personal projects) · DDEV/Docker · NGINX · Linux · cPanel/WHM · Security Hardening · Malware Recovery · Backup Automation

eCommerce & Payments: WooCommerce Subscriptions · Multi-Step Checkout · Dynamic Product Workflows · Payment Gateways (PayGlocal raw API, Stripe, Razorpay, PayPal, PayU)

CRM, Marketing Automation & APIs: REST API Integrations · HubSpot (Forms, Email Automation, API) · Privacy-Aware Lead Forms (consent capture, DPDP/GDPR-aware) · Salesforce · Pipedrive · Workable · Zoho CRM

Performance, SEO & Accessibility: WCAG Web Accessibility · Core Web Vitals · Lighthouse · Google PageSpeed · Minification · Caching · Query Optimization · Regex Redirects · On-Page SEO

Other Platforms: Webflow CMS · Finsweet V2 · Webflow Interactions · Shopify Liquid · Squarespace · Wix

Currently Learning: Headless WordPress (REST API / WPGraphQL + Astro)

PROFESSIONAL EXPERIENCE

Certinal (a Zycus company) | Senior WordPress Developer, Marketing | *Jul 2026 – Present* | *Bengaluru*

- Led the WordPress-to-Astro migration of certinal.com (now 1,640 pages); develop and maintain Certinal's WordPress and Astro marketing sites, owning the work from core architecture through deployment.
- Built the Claude Code workflow through which certinal.com is managed entirely: custom Agent Skills, subagents and MCP servers connect to project tooling; CLAUDE.md project memory keeps components, content structure and conventions consistent across sessions.
- Implemented WCAG web accessibility on the certinal.com marketing site to make its pages usable with keyboards and screen readers.
- Coded all of certinal.com's custom HubSpot lead forms (demo-request and newsletter) with validation, honeypot and disposable-email checks to keep spam out, plus a privacy-consent checkbox; implemented HubSpot email automation workflows.

- Set up trunk-based CI/CD for certinal.com on Sevalla so builds run on dev before promotion to production; deploy other Astro sites to Cloudflare Pages with Node.js/nvm builds; manage Cloudways and Cloudflare DNS/WAF.

Outright Solutions Pvt Ltd | WordPress Developer, Full-Stack & Project Lead | *Jan 2025 – Jun 2026* | *Kolkata*

- Delivered 50+ international projects end-to-end for US, UK and New Zealand clients, owning stakeholder communication, requirements analysis, Figma/XD/PSD-to-WordPress builds, QA and on-time launches.
- Tripled team throughput by introducing AI-augmented workflows (Claude, Cursor, Gemini, Grok, Qwen) and context-engineering practices.
- Recovered critical, last-minute projects on tight deadlines as go-to engineer, leading sub-teams through data migrations and QA; ran technical interviews and mentored new hires on global variables, modular architecture, reusable components and production-grade coding standards.
- Engineered 25+ custom WordPress plugins, including a role-based membership subscription platform (Elementor, ACF, WooCommerce Subscriptions) and a custom WooCommerce dashboard after migrating 750+ OpenCart products.
- Replaced manual document updates for Castle Trust (UK bank) with a global document system and dynamic PDF/ODF generation: one backend edit propagates site-wide and Summary Box PDFs regenerate when ACF product data changes.
- Shrank a 3,000-redirect migration to 250 regex rules, saving ~4 developer-days and reducing SEO risk.
- Saved hours of manual work per SEO migration by building data-copier-chrome-extension (JavaScript, Manifest V3, GPL-3.0), whose on-page element picker copies chosen metadata fields between source and target tabs with per-domain mappings that persist.
- Built third-party REST API integrations: Salesforce and Pipedrive CRM sync with WordPress client portals, and Workable job ingestion that auto-removes expired roles from Castle Trust's careers page.
- Architected a 100+ page multilingual WPML site with custom templates, dynamic routing and redirection logic so visitors reach the correct language version of each page.
- Developed the Boilers n Bits WooCommerce store with a custom multi-step checkout, tailored customer dashboard and shop-page filtering, using ACF relational logic to surface suggested products in tabs for cross-selling.
- Shipped a custom Webflow platform for Identos Inc.: CMS-driven dynamic templates, Finsweet V2 attribute filtering, HubSpot form integration with custom layout overrides, Webflow Interactions and a global style/component library for brand consistency.
- Created SVG draw animations, GSAP scroll-triggered interactions and a custom investment calculator to drive on-site engagement for EIS Club.
- Streamlined user onboarding by binding ACF profile fields to WooCommerce billing and shipping details, reducing manual data entry and improving data consistency.

Elrick Technology Pvt Ltd | WordPress Developer | *Dec 2020 – Dec 2024* | *Kolkata*

- Delivered 300+ WordPress sites, including Figma/XD/PSD-to-WordPress builds, eCommerce stores, directory portals, doctor and hotel booking platforms with payment gateways, and membership and subscription sites.
- Enabled international payments for StudentHelp with a raw-API PayGlocal gateway in PHP and JavaScript, built without WooCommerce: tokenization, HMAC signature validation, encrypted callbacks, error management, secure server-side logic and a custom UI.
- Automated Aliq.se's consulting operations with a PHP/MySQL WooCommerce Subscriptions engine: monthly consulting-day credits tied to renewals, consultant availability calendars and booking dashboards, subscription history and automated subscription sync; open-sourced a generic version as subscription-consulting-im.
- Raised GuideMeEducation's application completion rates and reduced onboarding friction with a multi-step Elementor bulk-apply form: per-step saving, entry deduplication, dynamic GET/POST appending and a custom post-to-WooCommerce-cart plugin.
- Improved Core Web Vitals 40–60% on multiple client sites through performance optimization: minification, caching strategies and query tuning.
- Owned the infrastructure lifecycle end to end (NGINX configuration, SSH/server hardening, backup automation, Git + DDEV/Docker staging deployments, Google PageSpeed optimization), restoring compromised sites through malware recovery and live database restoration.
- Extended Elementor past its built-in features with custom widgets (dynamic GET/POST URL routing), custom post templates, ACF Pro flexible and repeater field integrations and CPT/taxonomy architectures, giving client sites JetSmartFilters-powered search.

PROJECTS

AI Outreach Automation System | *Claude Plugin · MCP Server (.mcpb) · SMTP/IMAP*

- Built a Claude plugin and 11-tool MCP server bundle (.mcpb) so non-technical assistants can run a men's lifestyle magazine's entire sample-for-review outreach, starting with finding and qualifying brands, from a single slash command.
- Structured the plugin as an orchestration skill, 3 slash commands and 5 reference files, so business rules stay editable without touching workflow logic.
- Enforced guardrails in code, not prompts (rolling 24-hour send limit, duplicate, do-not-contact and past-coverage checks, on-page address verification, timeout handling), so no email is sent twice or to a blocked contact.
- Designed robots.txt-compliant contact discovery (Impressum, Mentions légales, obfuscated addresses) and hardened the agent against prompt injection by treating email and web text as untrusted data.
- Added SMTP/IMAP email automation with personalized messages in 6 languages and 8-category reply triage with load-balanced team assignment; validated end-to-end in test mode.

Agentic WordPress Automation | *Claude · Novamira (WordPress MCP) · WP-CLI · Bash · SSH*

- Connected Claude to WordPress sites through Novamira, a WordPress MCP server plugin, so the agent can automate workflows by running PHP, WP-CLI and database operations.
- Reduced complex, multi-step WordPress and server tasks to a single terminal command with WP-CLI and SSH Bash (.sh) scripts.

Local LLM Fine-Tuning for Agentic WordPress | *mlx-lm · QLoRA · Qwen3.5-9B · LM Studio · OpenCode*

- Trained QLoRA adapters (mlx-lm) for the open-weight Qwen3.5-9B on WordPress, Elementor and Novamira datasets on a 24 GB Apple Silicon Mac, enabling on-device agentic WordPress development.
- Kept inference local by serving the model through LM Studio, with OpenCode as the coding agent and Repomix packing codebases into model-ready context.

Loan Management System | *PHP · MySQL/MariaDB · Bootstrap 5*

- Cut financial reconciliation time by ~70% with a standalone PHP loan management system (customers, loans, repayments, statements) secured with RBAC, audit logs, encryption and CSRF protection.

OPEN SOURCE (GITHUB)

- **filterable-gallery-elementor-pro-v1**: Elementor gallery for any public post type with hierarchical taxonomy drill-down filters, debounced live search and nonce-verified AJAX pagination (PHP/JS, GPL-3.0)
- **portfolio-gallery-lightbox-acf**: AJAX-loaded Swiper slider and PhotoSwipe full-screen lightbox for Elementor loop-grid portfolios using the ACF gallery field, with images and video (PHP/JS, GPL-3.0)
- **gsap-process-horizontal-timeline-widget-elementor**: Elementor widget for a scrubbed horizontal process timeline built on GSAP 3 and ScrollTrigger (PHP/JS, GPL-3.0)
- **dynamic-url-button-with-get-parameters**: Elementor button widget that appends GET parameters from post ID, title, slug, date, author, category or tag (PHP, GPL-2.0)
- **acf-gallery-slider_ind**: [acf_gallery_slider] shortcode with a Swiper main and thumbnail slider that skips loading Swiper when the theme already does (PHP)
- **youtube-video-in-frame**: Lazy YouTube Embed plugin whose [lazy_youtube] shortcode swaps a thumbnail and SVG play button for a youtube-nocookie iframe on click, with no YouTube API (PHP/JS, GPL-2.0)
- **Custom-Navbar-Menu-Wordpress**: [custom_arrow_menu] shortcode with a custom Walker_Nav_Menu for any menu depth and SVG submenu toggles (PHP, GPL-3.0)
- **nifty-market-digest-bot**: Serverless Python 3.12 bot posting a daily NSE/BSE/AMFI/IBJA/Yahoo market digest to Telegram via scheduled GitHub Actions since Aug 2026; 142 unit tests, partly built with Claude Code (MIT)
- **react-feedback-app**: 2021 React practice app using Context API, hooks and react-router (JavaScript)

EDUCATION & CERTIFICATIONS

B.A. (Honours), Jadavpur University, Kolkata
Certification: Full Stack Software Engineering, Scaler Academy
