PROFESSIONAL SUMMARY

Senior WordPress Developer with nearly 6 years delivering 620+ sites across WordPress, Webflow, Shopify and other platforms, specializing in PHP custom themes and custom plugins, WooCommerce, payment and CRM API integrations, security hardening and Core Web Vitals, with team leadership and mentoring experience. At Certinal (a Zycus company; consent and eSignature SaaS for India's DPDP Act), led the WordPress-to-Astro migration of the 1,640-page marketing site, implemented WCAG accessibility on it and manages it through Claude Code and Model Context Protocol (MCP) servers.

TECHNICAL SKILLS

WordPress: Custom Themes · Custom Plugins · Hooks & Filters · Custom Post Types & Taxonomies · Gutenberg · Elementor Pro · Advanced Custom Fields (ACF Pro) · WooCommerce Subscriptions · WPML · WP-CLI

Languages & Frontend: PHP · JavaScript (ES6+) · MySQL/MariaDB · AJAX · HTML5 · CSS3 · Responsive Design · Astro · Node.js · jQuery · GSAP · Python, React & TypeScript (personal projects)

AI-Assisted Development: Claude Code · Agent Skills & Subagents · MCP Servers (.mcpb) · Cursor · Local LLM Fine-Tuning (mlx-lm, QLoRA)

DevOps & Hosting: Sevalla · Cloudflare (Pages, DNS, WAF) · Cloudways · CI/CD (trunk-based development, dev-to-prod promotion) · Git · GitHub Actions · DDEV/Docker · NGINX · cPanel/WHM · Security Hardening

Performance, SEO & Accessibility: WCAG Web Accessibility · Core Web Vitals · Lighthouse · Regex Redirects · On-Page SEO

Integrations & Platforms: REST API Integrations · HubSpot (Forms, Email Automation, API) · Privacy-Aware Lead Forms (consent capture, DPDP/GDPR-aware) · Salesforce · Pipedrive · Workable · Payment Gateways (PayGlocal raw API, Stripe, Razorpay, PayPal, PayU) · Webflow · Shopify Liquid

Currently Learning: Headless WordPress (REST API / WPGraphQL + Astro)

PROFESSIONAL EXPERIENCE

Certinal (a Zycus company) | Senior WordPress Developer, Marketing | *Jul 2026 – Present* | *Bengaluru*

- Led the WordPress-to-Astro migration of certinal.com (now 1,640 pages); manage it entirely in Claude Code, with CLAUDE.md, custom Agent Skills, subagents and MCP servers keeping conventions consistent.
- Implemented WCAG web accessibility on the certinal.com marketing site to make its pages usable with keyboards and screen readers.
- Built certinal.com's custom HubSpot lead forms with validation, honeypot and disposable-email checks to keep spam out, plus a privacy-consent checkbox; implemented HubSpot email automation workflows.
- Set up trunk-based CI/CD for certinal.com on Sevalla so every build runs on dev before promotion to production; deploy other Astro sites to Cloudflare Pages; manage Cloudways and Cloudflare DNS/WAF.

Outright Solutions Pvt Ltd | WordPress Developer, Full-Stack & Project Lead | *Jan 2025 – Jun 2026* | *Kolkata*

- Delivered 50+ international projects end-to-end for US, UK and New Zealand clients, owning stakeholder communication, requirements analysis, Figma/XD/PSD-to-WordPress builds, QA and on-time launches.
- Tripled team throughput by introducing AI-augmented workflows (Claude, Cursor, Gemini).
- Recovered critical, last-minute projects on tight deadlines as go-to engineer, leading sub-teams through data migrations and QA; ran technical interviews and mentored new hires on coding standards.
- Engineered 25+ custom WordPress plugins, including a role-based membership platform (ACF, WooCommerce Subscriptions) and a WooCommerce dashboard after migrating 750+ OpenCart products.
- Replaced manual document updates for Castle Trust (UK bank) with a global document system: one backend edit propagates site-wide and Summary Box PDFs regenerate when ACF product data changes.
- Shrank a 3,000-redirect migration to 250 regex rules, saving ~4 developer-days and reducing SEO risk.
- Built third-party REST API integrations: Salesforce and Pipedrive CRM sync with WordPress client portals, and Workable job ingestion that auto-removes expired roles from Castle Trust's careers page.

Elrick Technology Pvt Ltd | WordPress Developer | *Dec 2020 – Dec 2024* | *Kolkata*

- Delivered 300+ WordPress sites, including Figma/XD/PSD-to-WordPress builds, eCommerce stores, directory portals, doctor and hotel booking platforms with payment gateways, and membership sites.
- Enabled international payments for StudentHelp with a raw-API PayGlocal gateway in PHP and JavaScript, built without WooCommerce: tokenization, HMAC signature validation and encrypted callbacks.
- Automated Aliq.se's consulting operations with a PHP/MySQL WooCommerce Subscriptions engine: monthly consulting-day credits, consultant availability and booking dashboards, and subscription sync; open-sourced a generic version as subscription-consulting-im.
- Raised GuideMeEducation's application completion rates with a multi-step Elementor bulk-apply form: per-step saving, entry deduplication, GET/POST appending and a post-to-WooCommerce-cart plugin.
- Improved Core Web Vitals 40–60% on multiple client sites through performance optimization (minification, caching, query tuning); owned NGINX, server hardening, malware recovery and Git/DDEV staging.

PROJECTS

AI Outreach Automation System | *Claude Plugin · MCP Server · SMTP/IMAP*

- Built a Claude plugin and 11-tool MCP server bundle (.mcpb) so non-technical assistants can run a magazine's sample-for-review outreach with one slash command; validated end-to-end in test mode.
- Enforced guardrails in code, not prompts (24-hour send limit, duplicate and do-not-contact checks, on-page address verification, prompt-injection defense), so no email is sent twice or to a blocked contact.

Agentic WordPress Automation | *Claude · Novamira (WordPress MCP) · WP-CLI · Bash*

- Reduced multi-step WordPress and server tasks to a single command with WP-CLI/SSH Bash scripts, and connected Claude to sites through Novamira to run PHP, WP-CLI and database operations.

Local LLM Fine-Tuning for Agentic WordPress | *mlx-lm · QLoRA · Qwen3.5-9B · LM Studio · OpenCode*

- Trained QLoRA adapters (mlx-lm) for Qwen3.5-9B (4-bit MLX) on WordPress, Elementor and Novamira datasets on a 24 GB Apple Silicon Mac, enabling on-device agentic WordPress development.

Loan Management System | *PHP · MySQL/MariaDB · Bootstrap 5*

- Cut financial reconciliation time by ~70% with a standalone PHP loan management system (customers, loans, repayments, statements) secured with RBAC, audit logs, encryption and CSRF protection.

OPEN SOURCE (GITHUB)

- **filterable-gallery-elementor-pro-v1**: Elementor gallery with AJAX search and taxonomy filters (PHP/JS)
- **portfolio-gallery-lightbox-acf**: AJAX Swiper lightbox for Elementor loop grids using ACF (PHP/JS)
- **dynamic-url-button-with-get-parameters**: Elementor button widget with dynamic GET parameters (PHP)
- **data-copier-chrome-extension**: Manifest V3 extension copying SEO fields between tabs (GPL-3.0)
- **nifty-market-digest-bot**: Python/GitHub Actions daily Telegram market digest; 142 unit tests (MIT)
